Paul Busch studied physics, mathematics and philosophy at the University of Cologne, where he obtained his first degree in Physics in 1979 and his PhD in 1982 with a thesis on the simultaneous measurability of complementary quantum observables. During his postdoctoral years at Cologne and Göttingen, he undertook investigations into a range of foundational problems of quantum theory and statistical physics. Following his habilitation, he was appointed University Docent in Theoretical in Cologne in 1988, and was awarded the title of Professor there in 1994. He held appointments as visiting professor and research scholar at a number of institutions including Florida Atlantic University (1986), the University of Heidelberg (in Philosophy, 1994), Harvard University (with Roy Glauber, Lyman Laboratory of Physics, 1994/5), and the Perimeter Institute of Theoretical Physics (2005-2007). He is Adjunct Professor at the Department of Physics and Astronomy, University of Turku. Paul held a chair in Mathematical Physics at the University of Hull and was Head of Department there from 2002 before joining the University of York in 2005.

Paul Busch's current research interests lie in the interface between physics, mathematics and philosophy, centred around questions concerning the relationship between quantum and classical physics, relativistic quantum measurement and quantum information theory. He is coauthor of three monographs, "The Quantum Theory of Measurement" (Springer, 1991/1996), "Operational Quantum Physics" (Springer, 1995/1997), and "Quantum Measurement" (Springer, 2016).

Paul Busch is Associate Editor of the "Foundations of Physics" journal and co-editor of the Springer monograph series "Fundamental Theories of Physics". He was elected Member of L'Académie Internationale de Philosophie des Sciences in 2008, Fellow of the Institute of Physics in 2014, and Member of the Foundational Questions Institute (FQXi) in 2015. From 2016-2018 he serves as President of the International Quantum Structures Association. In the 2017/18 academic year he holds a Royal Society Leverhulme Trust Senior Research Fellowship.
